

HAE Alphabet Review

Review Some of the Words You've Learned

Test your HAE alphabet knowledge! Match the words with the meanings.

- | | |
|---------------------|--|
| 1. _____ Diagnosis | a. This means something, like eye color or a disease, that can be passed on from a parent to a child. |
| 2. _____ Medication | b. The material in your cells that contain the information about you, like your eye and hair color and whether or not you have HAE. |
| 3. _____ Hereditary | c. Sometimes, this is given to help our swelling from HAE go down, stop the swelling from starting, or help you deal with discomfort from swelling. |
| 4. _____ Symptom | d. Medicine or medical care given to you when you are sick or not feeling well. |
| 5. _____ Vein | e. Edema means swelling, where a part of your body gets bigger because fluid has leaked out of the blood and pushed up under the skin. |
| 6. _____ Treatment | f. One of the tubes or blood vessels in your body that carries blood all around your body and back to your heart. |
| 7. _____ DNA | g. Naming the cause of your illness, usually by a doctor or medical professional, by understanding your symptoms and through medical testing. |
| 8. _____ Edema | H. Different feelings in your body that may make you uncomfortable or tired. Journaling about these feelings can diagnose the illness or disease causing these feelings. |
